## RNC Running A 1980s Campaign - The Left Is Not

---

[omega4america.substack.com](https://omega4america.substack.com)

Republicans fight the last war, never the current one.

**In 2024 the election will be decided by legal ballots to legal people at legal addresses - which are undeliverable. Those ballots are collected by the Postal Service and NGOs and voted for Leftists.**

Republicans just trained 200,000 poll watchers, who cannot distinguish a mail-in ballot from a Walmart from your mail-in ballot who will helplessly watch this happen.

The 2024 election in the swing states, if Trump might win one or two, will be decided by Lawfare - and we are in the middle of it right now.

Both of these Leftist strategies are in full swing and the RNC and Trump Campaign are completely blind to them. The RNC thinks this is 1988. The Lefties know it's not.

**Current predictions in the conservative press are that Trump is on track to win 57 states and perhaps France and Romania. Nothing stands between Trump and the White House - some sites are even naming key NSA officials for him.**

Notice all the focus on the “transition team?”

That’s fine if it all works out.

Deep analysis into some of the swing states, from those not only on the ground but in the foxhole - in this case the court room - tell a different story.

Enjoy the euphoria. Those engaged in the hand-to-hand are not quite so ebullient.

Let’s look at some recent happenings.

The U.S.P.S. has a process of scanning mail at its central processing centers, creating an image of each piece, then moving the mail on its way.

Our colleague Peter Bernegger, an expert on how the U.S. Mail is used to aid Leftist causes, did an FOIA request to see some of those images applied to ballots.

Watch this video:

Well guess what?

The Postal Service responded that for ballots, well, there is no imaging - thus no record of how many ballots went through the mail - although there is such data for every Disney family postcard.

Why would the Postal Service change how they scan mail? Why would they apply that only to mail-in ballots?

When evaluating potential fraud, one of the handy tools is to put yourself in the bad guy’s shoes and determine how you might do a baddy. Let’s do it!

We would use the U.S.P.S. to collect undeliverable ballots - keep no record of ever having collected them or even seen them - and nobody would be the wiser about what happened to a ballot from Phineas at the Walmart.

Every FOIA request would get the same message - we have no data responsive to your request.

You will recall if you are a longer term reader, our emails from Postal Service carriers outlining how in 2020 and 2022 they brought all undeliverable ballots to their respective facility; those ballots were given to Leftists.

We even published one or two mail carrier emails, leaving out the person's identity.

The RNC and Trump Campaign, fighting a 1980s election - never thought to look into this little morsel of activity that impacts every swing state - and can make the difference in the national election.

This was a terrific week for the GOP. They are seeing 3,000 more Republican votes in Nevada than Democrat votes. Wow. Clearly that get-out-the-vote strategy is working.

***Bet you didn't hear Whatley, the Repub Chairman tell you about the 150,000 mail-in ballot requests IN ONE DAY, made in Wisconsin?***

Oh, you didn't hear about that one?

**Think maybe that was Scott Pressler showing up in a minivan with those registrations? Perhaps it was Lara Trump in her yoga pants bringing those to the Election Commission?**

Well, we doubt it.

Better chance that while Republicans are screwing around with press releases about Nevada's fewer Electoral Votes than a Texas county, Wisconsin is being stolen big time by Lefties.

Wisconsin has been won in the last 4 even numbered elections by 25,000 votes or so. 150,000 mail-in ballot requests, in a single day does put sort of a contrast into place, doesn't it?

Do not email me that we are being doom and gloom.

If you want someone to blow smoke at you or hold your hand and tell you all is well, try Citizen Free Press or Revolver - our job at StopBogusBallots.com is to not bullshit you because we have data nobody else has.

Our team is digging deep into every one of those 150,000 identities - and you can bet we will publish information as it becomes available. And you can bet they were not registered by GOP organizations.

So how does the Republican get-out-the-vote campaign stack up against 150,000 mail-in ballot requests in a single day?

Remember, the propensity of any ballot from an ineligible address to vote for Kams is 97%. We are running tests right now on how many of those 150,000 are from bookstores, gas stations and vacant buildings.

How does that Republican strategy work against the 31,000 mail-in ballot requests made from ineligible locations we reported about last week? The GOP hasn't even looked into that one - fortunately we have and we are doing something about it.

While the Repubs completely ignore hundreds of thousands of ineligible ballots flooding the system, they are also ignoring, perhaps abandoning is a more appropriate word - street fighter, under-resourced lawyers fighting it out in the Wisconsin, Pennsylvania, Georgia courts.

As we write this article, the street-fighting lawyers in Wisconsin who have continually battled Lefties in the courts, are up against 13 DNC lawyers, plus now a half dozen Leftist groups who joined the case - to force the Wisconsin to disobey its own election law.

Go to our [StopBogusBallots.com](https://www.stopbogusballots.com) site for the litigation details - and you will find a ton of litigation our boys dropped in Pennsylvania, Wisconsin, Georgia, Colorado and some other states. This litigation is not the nonsense you see from election integrity groups who take the same case and run it in several states - collecting lawyer fees for each state - usually losing.

***These suits are about stopping ineligible ballots in 2024 - and the reaction from the Left - with a half dozen Leftist groups joining against our two guys - tells you how overmatched we are in the Lawfare game.***

The DNC is willing to spend 7 figures to stop our legal team in Wisconsin. The Republicans are not even in the courtroom. Some of that \$22 million the Repubs paid their campaign manager might have been better spent here.

It also tells you we are on target - the 2024 steal is coming from LEGAL ballots, mailed to LEGAL people, at LEGAL addresses - which are undeliverable. Either the person is gone or the address is not an eligible address.

We are posting Pennsylvania this week - and there are thousands of such addresses getting mail-in ballots.

Our litigation is around some variant of stopping a ballot to an ineligible address and the Left is going crazy trying to stop our guys.

We are now moving on to Plan B.

What do we do starting November 6?

It will be too late to stop a mail-in ballot but it won't be too late to evaluate those sitting in the bins waiting to be counted.

The Left employs Lawfare big time.

The Left has a competent DNC, well staffed and well paid. The Left has the courts and the bar associations who will disbar a lawyer challenging the 2024 outcome.

We have the evidence - before the election - with proper citizen claims being entered before the election.

That will make a difference - either in court or proving to America that their elections are not on the level.

Perhaps both.
