Wisconsin Team Challenges Over 150,000 BS Voters

omega4america.substack.com

Today three stories took place simultaneously. They impact the selection of the next U.S. President.

First, in Pennsylvania vans showed up with non-English speaking “voters” and voted them - placing them in front of voters waiting hours to vote. Some of the groups doing this are NGOs which the **Fractal Dark Money System** tied to known Chinese Communist networks.

The Trump Campaign is blind to this - and their 200,000 bullshit "poll watchers" can do nothing about it.

Most of the national voter integrity orgs, who have been sitting on the sidelines since August 7th, the last day to take a bogus voter off the voter roll, had another useless, interminable Zoom call to tell each other how irrelevant they are. These never end for these guys.

In Milwaukee, a robust street-fighting group of activists, using data our teams provided, challenged 4,900 addresses in the City of Milwaukee. These are now added to the 55,000 challenged in June and 94,000 challenged in another recent lawsuit.

So in a state that is likely to be determined by 25,000 ballots, the team identified over 150,000 voters, able to vote via mail-in, falling into one of 17 ineligible categories.

Such categories include "moved to another state," or undeliverable address.

Forgive us for not being on the useless Zoom call, we were busy putting points on the board.

We said for over 2 years the 2024 election would be determined in Michigan, Wisconsin and Pennsylvania.

Recent analyses from multiple sources agree there is no reasonable way for Trump to win without Pennsylvania.

Only if an outlier comes in - one not prepped by the Lefties with NGO ballot mills - maybe Virginia or New Hampshire - can Trump win.

The Trump Campaign has been pissing away money - \$22 million to its campaign manager - on useless fraud fighting operations like having 200,000 poll watchers in an election where 40% of the vote arrives via mail and 95% of the fraud is from ineligible addresses.

So the Trumpsters are pretty much screwed in Pennsylvania, Michigan and Wisconsin.

The Trumpsters seem to believe they are in a political campaign where civics reigns. Get-out-the-vote campaigns and ballot harvesting high propensity voters and voting early matter.

While they do, they are not the critical ingredient - they are the nice-to-haves.

Having dealt with the RNC in 2022, we came to 2024 with no illusions they could do anything competently - particularly understanding the battlefield.

So our teams have been working in these states, particularly Wisconsin, for 4 years - since Sheriff Clarke first brought us to the party. And now we are doing what the RNC should have been doing - challenging legal ballots, sent to legal people, at legal addresses which are undeliverable.

The numbers are staggering as we show on our website StopBogusBallots.com.

Why is the RNC missing this?

We had some interaction with one of the RNC's top attorneys.

Here is his comment:

The top guy Michael Whatley, and his top RNC attorney, have tons of good stuff brought to him every day, of real problems and actions to take to solve them. But his go-to line is: "oh, we'll be seen as disenfranchising voters from casting a ballot, we can't take that action".

So as you watch Michigan, Pennsylvania and Wisconsin slip out of reach for the Trumpsters, remember that Whatley is 100% responsible for this loss.

In high tech, when introducing disruptive software that changes how things are done in a meaningful way, we meet lots of people who are not stupid, they are simply not innovative. They are not open to ideas - they always fight the last battle. Their default response to any new idea is reticence rather than excitement.

The RNC is filled with these types and now it's game time and you are going to watch them in real time - and we will help point it out a bit.

The team at StopBogusBallots.com, Common Sense Elections, is stepping up - has been for several years - to fill the breach left by the RNC and Trump Campaign.

As things stand today, if there is no intervention, Trump will lose Pennsylvania, Michigan and Wisconsin.

He will lose them to NGO ballot mill operators, who we have been tracking, who collect undeliverable ballots and vote them. In some areas, NGOs will print their own ballots and vote them - assigning them to those undeliverable addresses.

Each of these states is likely to be won by 50,000 ballots, Pennsylvania by maybe 125,000. It's what one calls a "close run thing."

The StopBogusBallots.com team led by Peter Bernegger now has in place the **BEFORE THE ELECTION** lawsuit with all the evidence. We run a spreadsheet with about 10 tabs, listing name by name the 150,000 Wisconsin voters who are at an undeliverable address.

The team filed these legal complaints **BEFORE** the election, as far back as March 2024 - and the written response from the government is they would look into it.

Well, they didn't and these voters are now on the rolls, asking for mail-in ballots and casting ballots.

As the NGOs make up the ballots needed to outrun the “outrun the steal,” every one they assign to one of these 150,000 addresses is immediately flagged - because the team outed it dating back to March. The proper lawsuits were filed and the previous laches and standing defenses are overcome.

We know the Left is taking this seriously because they have 13 well-paid lawyers fighting our team’s 2. The Left has 6 other Leftist groups joining the fight to overcome our team’s challenges.

So while Michael Whatley chooses to not get his hands dirty, the StopBogusBallots.com team continues to skip the Zoom calls with useless voter integrity organizations to take the fight to the Left.

Much more to come....
