Colonel Timothy Shindelar (USMC Retired) discusses the dangers of "The Council" that has morphed into an organization un beholden to Congress as was originally intended, which is running the US government on "The StoneZone" (links below).

"The Council" and everyone and everything that emanates from them, has controlled the United States for the past fifty years for the purpose of extracting our nation's wealth. They use the tools of indictments, obstruction, and government agencies they have weaponized to attack their enemies under false color of law. Exposing them by name, their corruption and means of control, and identifying how to dismantle their illegitimate power is the first step in the restoration of the United States of America as a constitutional republic.
